Office Action Summary

U. S. Patent and Trademark Office

PTO-326 (Rev. 9-97)

Part of Paper No. ____

Application/Control Number: 09/542,346

Art Unit: 2855

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14, 17-19 and 23-27, drawn to flow meter, classified in class 73, subclass 779.
- II. Claims 15 and 16, drawn to read head and random access in class 717, subclass 11.
- II. Claims 20-22, drawn to motion speed detecting system in class 73, subclass 488.
- 2. The inventions are distinct, each from the other because of the following reasons: Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have functions.
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper. Because these inventions are distinct for the reasons given above and the search required for Groups I and III is not required for Group II, restriction for examination purposes as indicated is proper.

4. A telephone call was made to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Dickens whose telephone number is (703) 305-7047.
